University Hospitals Disclaimer

This information was developed by University Hospitals for its own internal use, and was not developed for use by any other healthcare providers. It may not be appropriate for your organization, and it may not be appropriate for particular patients in your organization. You may not use any part of this information unless you have independently confirmed with your own clinical experts any modifications that should be made with respect to your organization or the patients you serve, and further confirmed with such experts that this information is otherwise appropriate for your organization and the patients you serve. This information does not constitute medical advice, and is for informational purposes only. It is shared on an AS-IS, WHERE-IS basis, and all express or implied warranties of any nature are disclaimed.

Masimo Disclaimer

Masimo SafetyNet is a cloud-based remote patient management system that relies on Bluetooth and WiFi or cellular communication to transmit patient data and messages. The system can be configured to periodically transmit time-stamped patient data and provide alerts when patient data has not been received for a period of time. The system does not provide audible alarms.
